

# XCSB DONATIONS WISHLIST

*updated Jan. 16 2026*

If you have any of the items on this list (or similar) and would be willing to donate, please send an email to [contact@xcsb.org](mailto:contact@xcsb.org), tell us what you got, and we'll gratefully get back to you ASAP.

Having lost access to our old studios on the CSU campus, we will have to build our new studio from scratch. We have not yet finalized our site selection, so we can't yet give exact specs of what we'll need to outfit the space, but it's likely to include:

- Carpeting
- Desks
- Studio/office wheeled chairs (2-4)
- 2-drawer file cabinets
- Shelving
- Keypad entry lock for security
- Acoustic wall treatment

The actual studio gear is a little more technical; we don't expect to be able to replicate the high-quality equipment we had amassed (with listener donated funds!), but we do need pro-level gear that's not prone to breaking down under heavy use. We are looking at used gear, but perhaps you're a retired DJ w/ some turntables in the closet? Our list includes:

- 2 decent microphones (RE20, SM7b, or similar), + Cloudlifiers
- Vocal processors (preamp/EQ/compressor)
- 2 Direct-drive Turntables (Technics mk5, Reloop rp7000mk2, or similar), + RIAA phono preamps
- 2 rack-mountable CD players
- 1 cassette deck
- Broadcast mixing board
- 2 studio monitors
- 1 cue monitor
- headphones
- 19" Equipment racks
- cables
- 2 desktop computers

We will also be looking for some professionals with specific skills (again, we'll know more once a site is chosen):

- a Licensed Electrician to review and confirm power wiring and proper grounding
- (for at least one potential site) a contractor with experience in structural glass, to help double-layer a couple of large windows for sound-proofing.
